Q1. The right ventricle is located at the center of the heart. [1 marks]

Fig. 2.1

Figure: Fig2_1_HeartCrossSection.png

Q2. The testes are a part of the human body. Meiosis is the process of dividing the testes into two parts. [3 marks]

One has been completed for you.

Fig. 5.1

Figure: organs_two_systems.png

Fig. 5.2

Figure: mammalian_testis_micrograph.png

Q3. A sperm cell is a cell that divides into two individual cells. A sperm cell is a cell that divides into two individual cells. A sperm cell is a cell that divides into two individual cells. [3 marks]

Fig. 5.3

Figure: sperm_cell_micrograph.png

Q4. The temperature of the atoms in the nucleus of the atoms is the same as the temperature of the nucleus of the atom. [2 marks]

Q5. (b) State the organs that make up the central nervous system. [1 marks]

Q6. Scientists had higher breathing rates in the 550 ppm CO₂ plot. [2 marks]

Q7. (ii) State the names of the structures labelled A and B on Fig.2. [2 marks]

Q8. (d) Name two products of biotechnology, other than bread, that make use of microorganisms. [2 marks]

Q9. (d) Explain why reflexes occur in unconscious people. [1 marks]

Q10. (f) Discuss the effects of non-biodegradable plastics on terrestrial ecosystems. [5 marks]

Q11. (ii) Name the process that causes gas bubbles to form in the dough. [1 marks]

Q12. (e) Explain the effects of nitrate ion deficiency on plant growth. [3 marks]

Q13. (a) Describe how the structure of a neurone relates to its function. [3 marks]

Q14. A: Blood vessel C. [2 marks]

Q15. The nitrogen cycle is a process that occurs in the nitrogen cycle. [1 marks]

Q16. Plants growing in Europe begin center begin tabular cc top rule Plant Number & Leaf Area (cm²)
midrule 1 & 310 2 & 335 3 & 390 4 & 348 5 & 365 midrule Mean & 350 bottomrule endtabular endcenter (i)
Using the data in Table 5.2, calculate the mean leaf area for plants growing in North America. Give your answer as a whole number and include the unit. [2 marks]

Q17. The name of organism A is a comma. [1 marks]

Biotechnology is used in the process of bread-making.

Fig. 1.1 shows some of the steps in making bread.

Fig. 1.1

Figure: bread_making_steps.png

Q18. The effect of pH on lipase activity is shown on Fig.1. [6 marks]

Figure: Fig1_1_LipaseActivity.png

Q19. (c) Complete Table 2.1 by stating two structural features of epidermis and mesophyll tissues and explain how each feature is an adaptation for photosynthesis. [4 marks]

Q20. The advantage of using a pyramid of energy is that it is more efficient. [2 marks]

Q21. (e) shows a synapse and parts of two neurons. (e) begins center end center (i) Draw an arrow to show the direction of the signal across the synapse. [1 marks]

Fig. 4.1

Figure: synapse_diagram.png

Q22. (iii) Ancestors of monkey flower plants had a much smaller leaf area. Explain how the monkey flower plants have developed a larger leaf area over time. [5 marks]

Q23. The following are the advantages of this method: [3 marks]

Fig. 6.2

Figure: potato_tubers_method.png

Q24. (a) State the hormone released from the testes. [1 marks]

Q25. The term 'species' is a term used to describe a species. [2 marks]

Fig. 6.1

Figure: potato_varieties.png

Q26. Plants store starch in their leaves. [2 marks]

Q27. The process of converting ammonium ions into nitrate ions is called the nitrate reaction. [1 marks]

Q28. (f) Describe the process by which a fertilised egg cell is fertilised. [3 marks]

Q29. (iii) Name the gas that forms to create the gas bubbles in the dough. [1 marks]

Q30. noindent_____ (ii) State a conclusion for the results shown in Table
..... [1 marks]

Q31. Enzymes are catalysts. (a) (i) Describe what is meant by the term catalyst. [2 marks]

Q32. (b) (i) Name the source of energy used by organism A. [1 marks]
